

## ANALYSIS OF ONLINE EDUCATION EXPERIENCE OF PGDM STUDENTS-COVID LESSON

### -A PGDM Document

#### RESPONSES

##### Excellent

---

I am able to learn many things in online mode

I think the learning graph is growing fast

Lots of online guest lecture that give different perspective

Nothing, everything will be accepted

Sometimes external member barge to our academic sessions are create trouble, they should not be allowed

Video recordings should be standard practice

##### Fair

---

All good

Examinations should be conducted offline

I am scared of camera

If I learn online, why should I pay heavy fees?

In some areas network is not good in that area students face a lot of issues ..in the place of online classes put some skill development sessions so that everyone will be benefited ..

It was average and please keep only 2 or 3 hr class a day it's very difficult to get range and it's not productive also if it's more than 3hr

It's better be offline videos

Laptop is slow to respond, I don't know how to cope up

Learning is difficult in online environment

Offline class system was better

Sometimes it's too much of classes

The student should be provided videos recording rather than the youtube videos played in class. There should not be too many classes because sitting in front of laptop for longer periods of time make us feel dizzy and we can't concentrate properly.

Was not up to the mark

##### Good

---

able to learn more

Assignments should be less

Classes are interesting but we have huge pressure at home, so please avoid assignments

Few sessions are little exhaustive. 2 sessions alone can be scheduled in a day, considering the data availability. It's little distracting to prepare for exams from home, due to various factors.

Good, but should be a bit slow while teaching.

I don't believe this is happening to us, world moves in digits

I know teachers are working hard too

I think this is the future

If faculties share videos we can watch later also

It is tough at times to attend classes online as space is limited

Its good but I miss classroom interaction

Its good learning but data limitations are also there

Its not as effective learning as we get in normal classes.

Its too early to say anything now

None

Nothing, everything is fine

Please conduct non-academic sessions too  
Sometimes my house is in mess that affects online learning

**Poor**

Don't have signal mam  
I am loosing scope and interest to concentrate because of network issues. It is not suggestion it's my problem  
I don't get connectivity most of the time  
I am requesting on the behalf of our entire batch at least schedule next term classes by offline mode whenever its possible because students are not able to get subject properly through this online classes this is just a humble request  
It feels difficult to put questions online  
Make it short and clear and avoid exams  
People who are teaching offline. They don't have online teaching skills. Better to learn how efficiently teach online  
Please conduct classes on youtube so that it acts as a reference too.  
Please stop this online classes everyone out there were enjoying where as we ending up our day by listening to classes  
sessions should be made more interesting  
YouTube classes are more better than our online classes

**Very Good**

connectivity is a issue however its good way of learning  
courses like JMP and online courses are good way of learning  
Hope to have clear videos also  
I am able to finish many online free courses suggested by teachers  
I should spend more on technology  
learning is faster and clearer  
Lots of videos add to learning  
Some of the contents discussed online is very informative  
Technology is driving me crazy  
There should be online competitions

**Grand Total: 59**

Graph 1: Online Classroom Experience

### Analysis Stage 1 (Graphs 1):

1. 45% students found online activities good to excellent.
2. For 22% students, online teaching experience has been fair.
3. 20% students' response wrote this experience a poor one.

### Analysis Stage 2 (Table 1):

1. The good experience of learning was due to the fact that there were more learning opportunities for students online.
2. The intercation beyond college faculty in the form of guest lecture and webinars gave them perspective which was encouraging.

### Analysis Stage 3 (Graph 2 &3):

1. The response for poor online experience was based on specific reasones.
2. Connectivity Issue, Faculty Online Skills, Long Hours, Online Platform Related, Student Online Skills are reasons behind the poor experience.
3. Conectivity Issue were wer responsible in 25% cases.
4. Faculty Online Skill has been attributed in another 25% cases.
5. In 16% Poor experience Long hours are to be blamed.
6. Online platform were reponsible in 17% cases.
7. Student online skill was responsible in 17% cases.
